

**Current Situation**

The UDN is closely monitoring the ongoing coronavirus disease 2019 (COVID-19) pandemic. As the situation continues to change rapidly, our top priority remains the health, safety, and well-being of our community and the global community.

We are taking informed action to limit the spread of COVID-19 while ensuring the continuity of our research mission. The UDN remains operational with appropriate measures to protect the health of the community.

**Impact on Applications**

The UDN clinical sites remain fully staffed and continue to review new applications. After an application is received, the assigned clinical site will provide instructions for submitting medical records.

**Impact on Evaluations**

Some in-person evaluations may be delayed or replaced with virtual evaluations in accordance with hospital and university policies. Any changes to evaluations will be communicated to participants by the clinical sites.
